

DISPOSABLE PANEL FILTERS

FEATURES

The Glasfloss disposable panel filter has set the standard for quality and durability. This rigidly constructed air filter maintains its integrity where others fall short. Always the highest quality, Glasfloss disposable panel filters have metal grids on both the air entry and the air leaving sides.

CONSTRUCTION

The Glasfloss disposable panel filter uses a progressively dense fiberglass or 100% non-woven polyester media to maximize its high dust holding capacity. The media is encapsulated between two metal grids to maintain integrity under adverse operating conditions. The metal grids are thermally bonded to the internal sides of a heavy-duty, one piece craft-board frame. The closed corner construction prevents dust laden air from bypassing the media through open corners. The filter frame is clearly marked with size, U.L. classification and air flow direction.

APPLICATIONS

The Glasfloss disposable panel filter can be used as a direct replacement for filters supplied in original equipment. Standard sizes are available in 1" and 2" depths to accommodate most filter tracks. Any application can be accommodated with our special sizes, available in 1/2", 1" and 2" depths.

OPTIONS

Available with tape around the filter frame for added protection against moisture and/or support bars for added rigidity.

- Progressively Dense Fiberglass or 100% Non-woven Polyester
- Metal Grids on Air Entering and Air Leaving Sides
- Heavy-duty Construction
- Thermally Bonded

SPECIFICATIONS

The standard size filter element shall be constructed of a single piece of heavy-duty, one piece craftboard frame. The two metal grids shall be thermally bonded internally to the frame. The metal grids shall be 28 gauge and provide 82% open area. All corners shall be closed and sealed. The fiberglass filter media shall be coated with a non-toxic, non-flammable, odor free adhesive. The fiberglass media shall be constructed in a progressively dense fashion from air entering to air leaving side. The fiberglass media shall have a skin backing on the air leaving side. The polyester filter media shall be 100% non-woven polyester. Glasfloss disposable panel filters shall be rated to withstand temperatures up to 180 Fahrenheit. All filters shall be rated Class 2 under U.L. std. 900.

> **SPECIFICATIONS FOR DISPOSABLE PANEL FILTERS**

The standard size filter element shall be constructed of a heavy-duty, one piece craftboard frame. The two metal grids shall be thermally bonded internally to the frame. The metal grids shall be 28 gauge and provide 82% open area. All corners shall be closed and sealed. The fiberglass media shall be coated with a non-toxic, non-flammable, odor-free adhesive. The fiberglass media shall be constructed in a progressively dense fashion from air entering to air leaving sides. The polyester filter media shall be 100% non-woven polyester. All Glasfloss disposable filters shall be rated Class 2 under U.L. std. 900.
